KNOW ABOUT CRYSTAL JUNGLE

Crystal Jungle is a European porcelain tile designed to bring elegance, movement, and natural stone beauty into both indoor and outdoor spaces. With its stylish white base and dramatic gray-blue veining, this 13x26 inch tile creates a fresh, luxurious look inspired by the coastal architecture and serene landscapes of Santorini, Greece. Its stone-style design gives every space a refined modern character while keeping a soft, timeless appearance.

Made with a matte anti-slip finish, Crystal Jungle is perfect for areas where beauty and performance need to work together. It is an excellent choice for pool decks, patios, terraces, bathrooms, showers, feature walls, living areas, commercial spaces, and exterior floors. Its porcelain body makes it durable, easy to maintain, and suitable for in-and-out installations, allowing the same elegant surface to flow from interior rooms to outdoor areas.

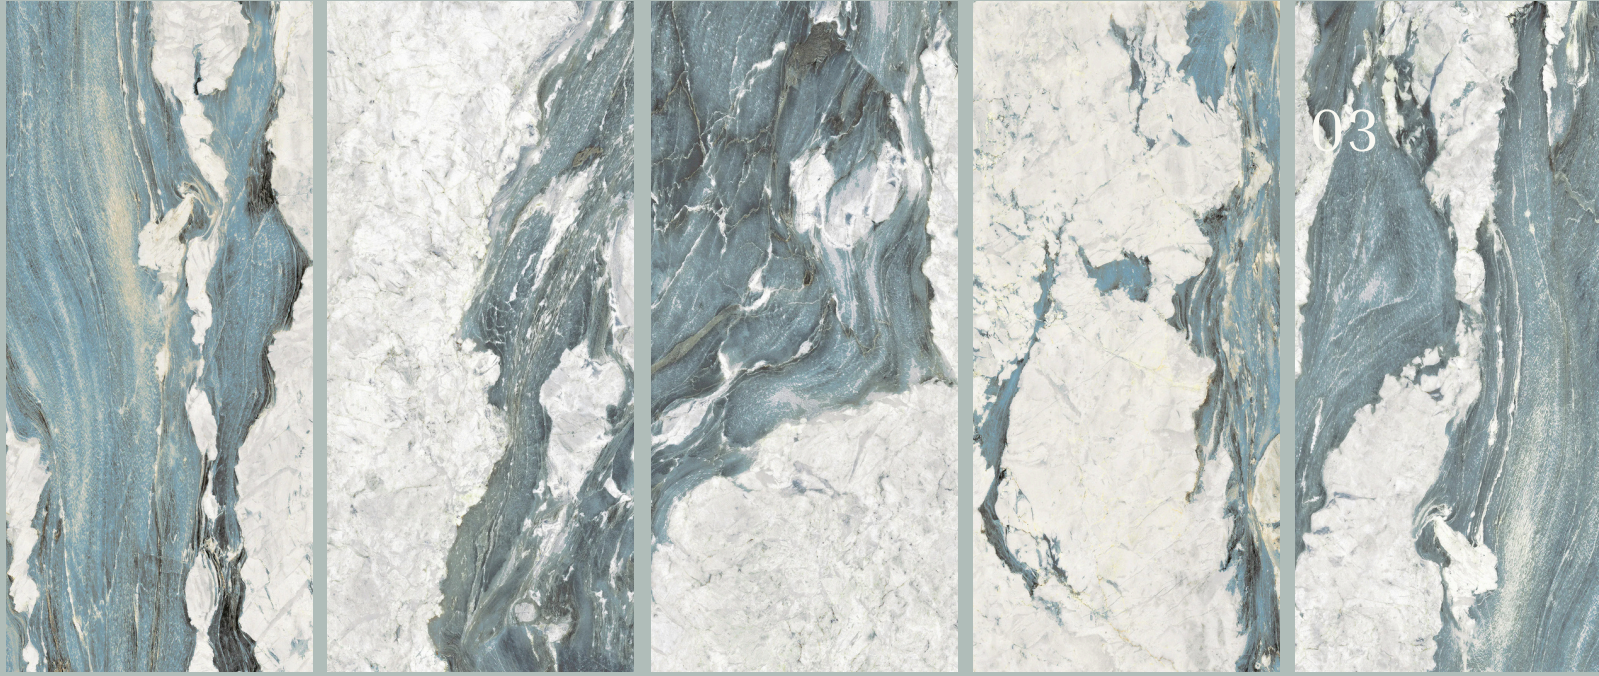

Crystal Jungle – Santorini elegance for floors, walls, and outdoor living.

One of the most beautiful features of Crystal Jungle is its wide range of random face variations. Each tile displays unique veining, movement, and color balance, creating a natural stone effect with very little repetition. The result is a stunning marble-stone look with modern European style, perfect for projects that need a high-end finish, Santorini-inspired atmosphere, and a fresh blue-white design that feels bright, clean, and sophisticated.
